

MAX-VISION®

PREMIUM WIPER BLADES

DESCRIPTION:

PEAK® Max-Vision® Wiper Blades are a conventional style blade that is still the most common wiper blade found in the North American aftermarket. Max-Vision® Wiper Blades are compatible with standard hook or pin wiper arms, which makes installation quick and easy. They differentiate themselves from other conventional wiper blades with their larger wipe surface which help create a cleaner windshield. Depending on the length of the blade, they can have up to eight pressure points distributing the pressure evenly across your windshield. The stainless steel frame, spline and rivets help ensure durability for the life of your wiper blade.

BENEFITS:

- Stainless steel rust-resistant frame
- Stainless steel spline and rivets to ensure durability
- Advanced rubber formulation for a smoother, cleaner wipe
- Larger wipe surface for a clear, complete wipe
- Quick and easy installation
- Re-sealable packaging helps minimize damages
- Customer friendly bilingual packaging
- Full line of wiper blades from 12" to 28"

APPLICATION:

Application information varies with your vehicle's year, make and model. Be sure to review your owner's manual, your retailer's application data or look up your vehicle's wiper blade size(s) and arm information at www.peakauto.com.
